

Hints & Tips

- Gently place your tweezers behind the base of the lashes.
- Pull the lashes towards you, then sideways and pinch the desired amount of lashes together to create your fan (3D /5D) we recommend.
- Once you are happy with your fan, pinch and pull forward from the lash base, ensuring you do not let go of the fan.
- Using your Jade Stone and Glue Dots, pop a small amount of Fast Lash, Master Lash or Flash Bond adhesive onto the stone and glue dot.
- Dip the base of the fan into the glue and this will hold the fan together, ready to place onto an isolated individual lash.

Please make sure you use the glue very sparingly.

Using too much glue will cause it to run up the lash shaft and close your fans up!

These lashes are infilled 14/16 the same as Individual & Russian Volume Fans.
